## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 8\_Q4

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### **Section 1 : Coding**

##### **1. Problem Statement**

A local municipality is implementing an online voting system for a community event and wants to ensure that only eligible voters (those aged 18 or older) can participate.

Your task is to develop a program that validates the age of individuals attempting to vote online. If the user's age is below 18, the program should throw a custom exception, `InvalidAgeException`, preventing them from casting their vote. If the input is invalid, catch the appropriate `InputMismatchException` and print the in-built exception message.

##### ***Input Format***

The input consists of an integer representing the age.

##### ***Output Format***

If the age is 18 or older, print "Eligible to vote"

If the age is below 18, print "Exception occurred: InvalidAgeException: Age is not valid to vote"

If there is any other type of exception, print "An error occurred: " followed by the in-built exception message.

Refer to the sample output for formatting specifications.

### **Sample Test Case**

Input: 20

Output: Eligible to vote

### **Answer**

```
// You are using Java
import java.util.*;

class InvalidAgeException extends Exception {
    public InvalidAgeException(String s) {
        super(s);
    }
}

class Main {
    public static void check(int a) throws InvalidAgeException {
        if (a < 18) {
            throw new InvalidAgeException("InvalidAgeException: Age is not valid to
vote");
        }
        System.out.print("Eligible to vote");
    }

    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        try {
            int a = sc.nextInt();
            check(a);
        } catch (InputMismatchException e) {
```

```
        System.out.print("An error occurred: java.util.InputMismatchException");
    } catch (InvalidAgeException e) {
        System.out.print("Exception occurred: " + e.getMessage());
    }
}
```

**Status :** Correct

**Marks :** 10/10
